SUMMARY

Detail-oriented Full Stack Developer with hands-on experience building full-stack applications using Java, Spring Boot, React.js, REST APIs, and MySQL. Skilled in developing CRUD functionality, integrating frontend and backend systems, designing responsive interfaces, and working with Git, Maven, and Postman. Strong understanding of SDLC, object-oriented programming, debugging, and client-focused delivery.

EDUCATION

Chandigarh Group of Colleges, Landran, Punjab | B.Tech in Computer Science and Engineering | Aug 2021 – Dec 2025 | CGPA: 8.60

Lord Mahavir Jain Public School, Ambala Cantt, Haryana | PCM | May 2020 – May 2021 | 81.6%

Lord Mahavir Jain Public School, Ambala Cantt, Haryana | Matriculation | May 2018 – May 2019 | 78.6%

PROJECTS

Cognivanta | Java, Spring Boot, REST APIs, MySQL, Maven, Git, React.js, Postman

- Built end-to-end full-stack modules using React.js for the frontend and Spring Boot for backend services.
- Designed and integrated REST APIs to enable efficient communication between frontend and backend components.
- Integrated MySQL for persistent storage and efficient retrieval of application data.
- Developed reusable and responsive React.js components and optimized database queries and backend logic for improved application performance.

Expense Tracker Application | Java Core, Maven, JDBC, MySQL, Git

- Developed a Java-based application to record, categorize, and manage daily expenses.
- Implemented CRUD operations using JDBC with MySQL for reliable and persistent data storage.
- Used Maven for dependency management and build automation while maintaining a structured project setup.
- Applied object-oriented programming principles and exception handling to improve application stability.

Avain Labs International — Ongoing Project | Java, Spring Boot, React.js, MySQL, Postman

- Developing a full-stack application with React.js for the frontend and Spring Boot for backend REST APIs and business logic.
- Using MySQL to manage product and category data and Postman for API testing.
- Developing reusable frontend components and integrating them with backend services.

AI Chatbot Automation Platform | n8n, OpenAI/Gemini API, REST APIs, Webhooks, JSON, AI Agents

- Developed an AI-powered chatbot using n8n and OpenAI/Gemini APIs for context-aware conversations.
- Designed automated workflows using AI agents, chat memory, triggers, conditional logic, and JSON-based data handling.
- Integrated external applications through REST APIs, HTTP Request nodes, and webhooks for workflow automation.

TECHNICAL SKILLS

Languages: Java, SQL

Backend: Spring Boot, REST APIs, JDBC

Frontend: React.js

Database: MySQL

Tools: Git, GitHub, Maven, Postman, VS Code, Eclipse

AI & Automation: n8n, OpenAI API, Gemini API

Coursework: Database Management Systems, SDLC, Agile, Object-Oriented Programming, AI, CRM, ERP, Generative AI, Agentic AI

CERTIFICATIONS

- Full Stack Developer — Hoping Minds
- SQL Essentials for Data Analytics — Mind Luster

ACADEMIC ACHIEVEMENTS

- Finalist — SAP Hackfest
- Winner — TECHATHON 2.0
- Winner — Web Designing Competition
